

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 1 Part A — Uninformed Search Algorithms

Student Name: __Zahara Seybou

Harouna _____

Student ID: _____30862027_____

GitHub Repository Link: _____<https://github.com/zaharaSHarouna/lab-4-llm-decision-support.git>_____

Date Submitted: __16-08-2026_____

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	yes
Estimated percentage of the work influenced by AI	19%
Did you attach evidence of AI use where applicable?	yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
ChatGpt	I was confused with the answer I got so I checked if there was a bug in my code but there was actually no bug. And used it to understand some ethical issues for the reflexion.	What are the implications of sending them to a third-party API in another country? check if this code is okay, why does it show 2/5 for temperature = 0 and 3/5 for temperature = 3/5 while temperature=0 should make	Final reflection And the part about temperature comparison	For the reflection I read understood and use my own world to explain. For the code checking my code wasn't wrong so I didn't edit it, I just understood something that I didn't know before which made the answer I got confusing for me.

		more identical output than the other?		

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached? (Yes, No, N/A)	File Name
AI-generated draft	yes	This file
Prompt history	yes	This file
Screenshot of AI interaction	yes	This file
Exported AI conversation	yes	This file
AI-generated code snippet	-	-
Revised version showing student input	In the file reflection part	The jupyter notebook

check if this code is okay, why does it show 2/5 for temperature = 0 and 3/5 for temperature = 3/5 while temperature=0 should make more identical output than the other?

1. Why temperature=0 can still give 2/5

You expected:

- Temperature 0 → ideally 1/5 unique output
- Temperature 1.0 → more variation, maybe 3/5, 4/5, or 5/5 unique outputs

That expectation is reasonable. But temperature = 0 does not always guarantee perfectly identical outputs with an API model.

*What are the implications of sending them to a third-party API in another country? *

Sending data to a **third-party API located in another country** can have several implications:

- **Privacy:** Personal or sensitive information leaves your country and is handled by another company. You need to know what data they collect, store, and process.
- **Data protection laws:** The API provider may be subject to the laws of their country, while your organization may also have to follow your own country's data-protection requirements.
- **Data sovereignty:** Some countries require certain types of data to be stored or processed within the country or impose conditions on international data transfers.
- **Security:** You are relying on the third party to protect the data. A breach at the API provider could expose your users' information.
- **Government access:** Data stored in another country may potentially be accessible to authorities under that country's laws.
- **Control and accountability:** Once data is sent externally, you have less direct control over how it is stored, processed, or deleted. You should therefore check the provider's privacy policy, security practices, data-retention policy, and contractual terms.
- **Cost and reliability:** International APIs can also introduce higher latency, exchange-rate costs, service outages, or dependence on a foreign provider.

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	
Any use of AI tools has been clearly declared in this form.	yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	yes
I reviewed, tested, edited, and improved any AI-generated content before submission.	yes
My AI usage does not exceed 25% of the entire work.	yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	yes
